Education

M.Eng. Design Science

Chiba University (千葉大学) 2016

Industrial Design Major

Institute of Technology Bandung
2010

Skills

- Prototyping
- Product Strategy
- UX Testing and Research
- Design Leadership
- Workshop Facilitation
- AI Workflows

Tools

- Figma
- Codex
- Cursor
- Maze

Language

- English (TOEIC 936)
- Japan (N4)

Work Experience

Product Design Lead-Grab

May 2024 - Today

- Owned the end-to-end in-transit experience, using AI to accelerate research synthesis, translation, prototyping, and project management while maintaining design quality.
- Spearheaded a redesign of the driver Earnings experience to address declining driver sentiment, correct take-rate misconceptions, and help drivers understand that higher earnings per hour can coexist with lower earnings per kilometre; supporting a shift toward longer-term earnings goals.
- Lead research and design strategy for an airport advance booking experience where timing uncertainty and cancellations contributed to an ~85% fulfilment rate against a 96% target, using AI to synthesise research across three markets in 1–3 days instead of weeks and accelerate alignment on product direction.
- Designed the driver-facing proof-of-delivery experience to make required photo clearer without slowing drivers down; showed up to a 5% reduction in potential batch resequencing. Its ML-assisted photo validation extension was approved by Grab's Patent Office for patent filing.
- Delivered "On Time, Every Time" initiative. Contributed to a ~0.23pp reduction in late orders in high-density markets like Jakarta and Ho Chi Minh City.

Product Design Lead-Gojek

April 2021 - May 2024

- Lead the Driver Platform team, include Supply group, Benefits and Quality group, and Fulfillment.
- Manage 4 Product Designers, ensuring they are equipped with the necessary resources and support to effectively execute their tasks.
- Work closely with stakeholders across functions to facilitate OKR planning workshops and develop a design and research roadmap that aligns with the company's overall product strategy.
- Take the lead in identifying opportunities for designers to incorporate data into their work, and model best practices for using data to inform design decisions.
